SUVPN MSP for working from home

By following the simple steps below you can gain access to the SU network and its services.

What do you need?

A computer to access the network and a cell phone which should be kept nearby when you want to log on to the network.

Important Note: Make sure that Windows updates and Antivirus is up to date. Make sure other Citrix applications are NOT running on the device when trying to launch the Citrix Gateway

Step 1:

Install device compatibility check software

- a. Open Chrome Browser and go to <u>https://suvpnmsp.sun.ac.za/</u>
- b. Your device will need to be checked if it meets the requirements, **Download** and **Run** the plugin

Please note: Do no close browser window. It will be needed again later.

c. Click Yes if prompted

d. Click Install

e. Click Finish

Step 2:

Scan your device for compatibility

a. Click Yes to start the scan

💼 Citrix Gateway X				
CitrıX ° Gateway				
EPA				
Gateway Server suvpnmsp.sun.ac.za				
In order to access specific corporate resources, an endpoint analysis scan is required. Information about your system is sent to your corporate network for further evaluation.				
Do you wish to run the scan?				
Yes No Always				

b. Wait for the scan to complete

	Gateway		×
EPA			
	Gateway Server	suvpnmsp.sun.ac.za	
			-
			Abort

Step 3:

Sign in

a. After the scan, return to your browser window and log in with your SU credentials

Step 4: Install Citrix Gateway Plug-in

a. Download and Run the Citrix Gateway Plug-in

b. Click Install

c. Click Yes for the UAC pop up

d. Click Finish

e. Click Yes to restart the device

Step 5:

Connect to SUVPNMSP with the Citrix Gateway Plug-in

a. Once installed, the Citrix gateway can be accessed from the Start Menu. Once open it and you will be prompted to logon after which it will connect to the SUVPNMSP

🙆 Citrix Gateway		×
citriX ° Gateway		
🗮 Login		
Connection	suvpnmsp.sun.ac.za v	
Username	username	
Password	•••••	
		Logon

Note: Make sure to only enter your username when prompted

b. From here the user will have access to services as if they were on campus

Important Note: Make sure that Windows updates and Antivirus is up to date. Make sure other Citrix applications are NOT running on the device when trying to launch the Citrix Gateway

Step 6:

Troubleshooting

a. If you trying to connect and get the screen below you will need to update your antivirus with the latest update before you can connect.

Citrix Gateway	
CCESS DENIED	
Your device does not meet the requirements for logging on. For more information, contact your help desk and provide the following information: Case ID : a7e98 Access might have been denied because of following issues. Please retry after rectifying relevant issues • None of Antispyware installed on your machine has recent virus definition file	
	ок

b. Once updated, you will be able to connect to SUVPNMSP with the Citrix Gateway Plug-in
